River Night

*The moon shines like sequines upon the water,
the wind has gone to sleep.*

*The tide is running swiftly out,
Late for an appointment to keep.*

Ships glide through the moonlit water,

Whiling softly in the night.

*Gulls quiet and sleeping,
Waiting for the morning light.*

The waves gently lap the shore,

Tickling the sandy beach.

The stars hang from long threads,

Just beyond the tall trees reach.

And the river, tired from the day,

Settled down for the night.

Chester Kucyn

My home is near the Hudson,

in the highlands by her side,

Where still she hears the ocean's call,

the beckon of her tide.

How dearly is that country loved,

oh what it means to me,

While yet I feel as strong a spell,

the whisper of the sea.

Now I am young and at my best,

but in my soul I know,

That long before I'm at my rest,

a rovin' I must go.

Then when I'm finished with this task,

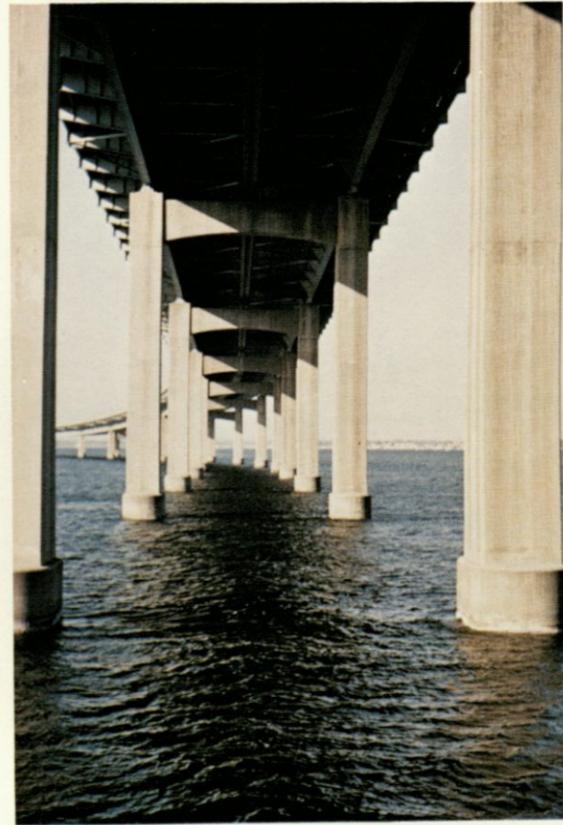

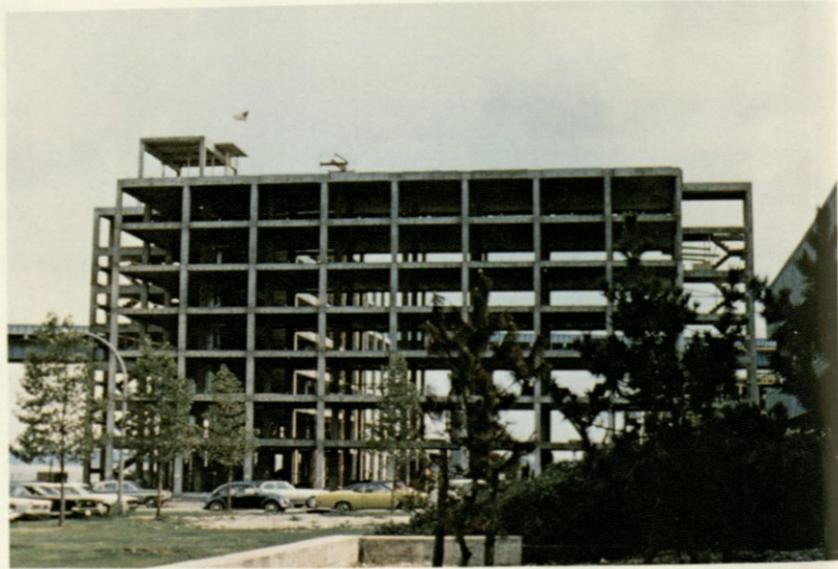

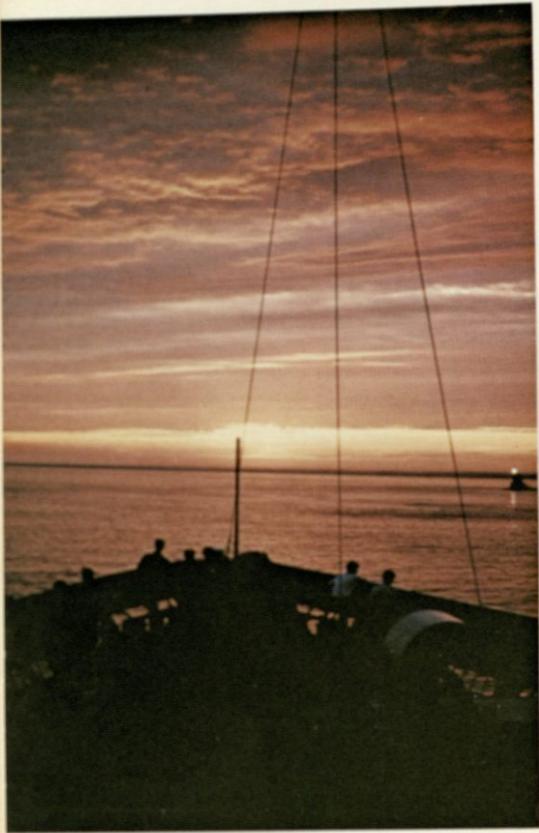

no longer will I roam,

Fulfill for me one wish I ask,

to end my days at home.

JOSE A. DELFAUS
Meteorology and Oceanography

Came from the South East Bronx, with the intention of being an engineer. Switched to the seeming glories of a meteorologist and oceanographer. He learned different as time went by. With it came great discoveries and great disappointment. The adventures and nick-names that come with college, "Don Juan", "Latin Lover", etc. were minor as compared to the effect it had on his life. It shall never be forgotten.

 "I have, let's say, sixty years to live. Most of that time will be spent working. I've chosen the work that I want to do. If I find no joy in it, then I'm only condemning myself to sixty years of torture. And I can find the joy only if I do my work in the best possible way to me. But the best is a matter of standards — and I set my own standards. I inherit nothing. I stand at the end of no tradition. I may, perhaps, stand at the beginning of one."

It's over now. I am glad of that! I can't say that I've enjoyed this stop over. There were some good times and some good people, and they shall always stand out in my mind. After four years of stagnation, it is time to begin to move again. It will do no good to dwell on the past, the future waits for no one. If I fail to achieve my goal of happiness, it is because I am unworthy of such a goal, because I had not the endurance or the desire to continue the quest.

The Dome is the only place I know where you can live so many lives and yet miss so much of life. After four years one asks himself if the advantages outweigh the disadvantages. I think not. Then again, I payed more than the average price.

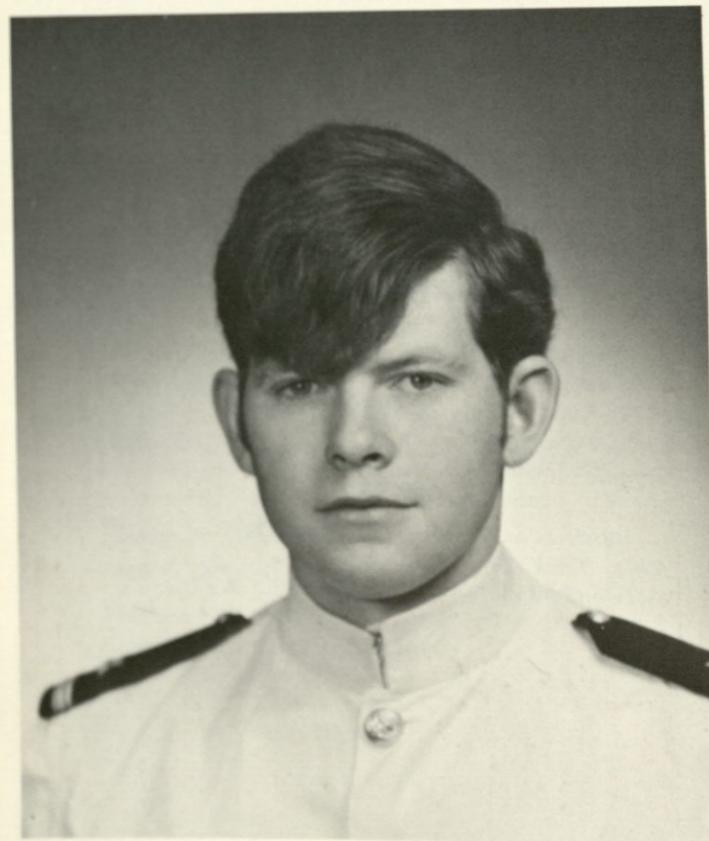

Wrestling, Betterment Committee.

JAMES JOHN HAMMOND
Marine Transportation Science

Four years have passed but not uneventful. The cruises proved to be an educational experience, and little of this experience pertained to the sea. I think that in the future I will not make the same mistakes that I have in the past four years. So now with all of this behind me, I feel that I am better suited to make my way in the world, and for this I am grateful.

A Word To The Wise: Maritime College is a place where you learn about a lot of things in a lot of different ways. I must admit some of the ways are not considered proper in today's society, but then some of the things you learn here are not given any credit in the society either. Over all it has been a nice experience, but if I ever have to live my last four years again I think I would rather skip this path. May the future help me change my opinion.

My three years at the Dome have been enjoyable, as have the majority of the cadets. However, there are an over-abundance of persons who are unreliable and unconcerned for the welfare of the cadet at large. *"If I leave here alive, I'll leave nothing behind.
 They'll never count me among the broken men,
 But I can't say that I'm normal either."*

DON'T QUIT

*When things go wrong, as they sometimes will,
 When the road you're trudging seems all uphill,
 When the funds are low and the debts are high,
 And you want to smile, but you have to sigh,
 When care is pressing you down a bit,
 Rest if you must, but don't quit.*

*Life is queer with its twists and turns,
 As every one of us sometimes learns,
 And many a fellow turns about
 When he might have won had he stuck it out.
 Don't give up though the pace seems slow —
 You may succeed with another blow.*

*Often the goal is nearer than
 It seems to a faint and faltering man;
 Often the struggler has given up
 When he might have captured the victor's cup;
 And he learned too late when the night came down,
 How close he was to the golden crown.*

*Success is failure turned inside out —
 The silver tint of the clouds of doubt,
 And you never can tell how close you are,
 It may be near when it seems far;
 So stick to the fight when you're hardest hit —
 It's when things seem worst that you mustn't quit.*

Something New

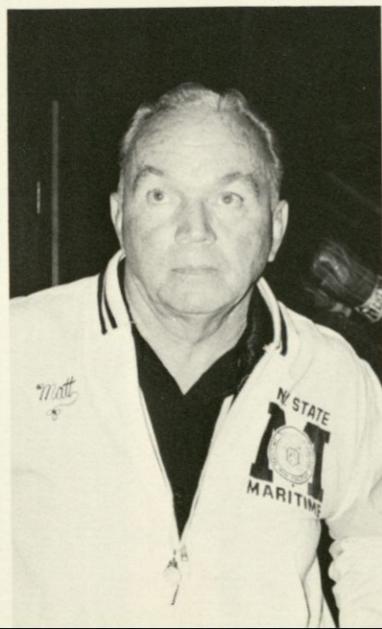

THE NIXON YEARS

1968 to 1972 have been the Nixon years, the years of change, repression and re-evaluation. Let us remember these years for the changes we experienced within the school, the country and the world. For with these changes came growth, maturity and self realization of goals and ideals.

REMEMBER?

Man on the moon, Jackie O., Spiro Who?, Mr. Lindsley, Nixon in Peking, John & Oko, the Panthers, JDL, the Weathermen, Charlie Manson, Kent State Shootings, The Cambodia invasion, Biafra, Bangladesh, the Berrigans, Lieut. William Calley, The Pentagon Papers, Phase I & II, The New Supreme Court, the Middle East and Northern Ireland, Woman's Lib., Skyjackings, Midi, Mini, Maxi and braless.

Jesus Freaks, Ecology Freaks, Occult Freaks, Bicycle nuts and joggers. Did you put up posters and wear buttons? Sit ins, Be-ins, Love-ins, The Age of Aquarius, Bomb Hanoi, bring home the P.O.W.'s, the Pueblo Incident, The Super Bowl, Olympics in Mexico, photos of Mars and Venus, QE2 launched, Senator Kennedy at Chappaquiddick, China in the U.N., Czechoslovakian uprising, Boeing 747 in service.

The Draft, the Lottery, the Chicago 8, Columbia riots and Oil leaks., Strikes for mailmen, firemen, policemen and grape pickers. Did you give blanket parties or get a Pink Belly? Brace it up, the green chair, chinese push ups and Goons. A funeral for a fly, One Hand, Knives, matches, pap sheets and change of a quarter. What is for dinner? Gee, HAP, Horse, Duck, Lowpants, Fudd, Joe Pesc, Skramie Marks, Saturday March arounds, MIAPS, restriction or worse weekend watch.

What do you think of when you think of nature?
Do you see the majestic mountains of purple rock
peaked with virgin snow,
Or is it pictures of yellow wheat — the staff of life,
waving under the sky of fleece,
Or do you conjour visions of animals,
Furry, fearsome, fine or feathery?

I think of the Sea.
I see powerful mobile mountains capped in white,
I picture the source of Life full of radiant colour,
I conjour pictures of the largest animals moving with
unearthly grace
And specks of life that are neither animal or
vegetable and
no less significant.
I feel the salty sea rushing through my veins
as it's vapors protect me from above.
I taste it's coolness and feel refreshed,
For I know that before I was born
the sea was my home.

SATURDAY & SUNDAY

48 hrs. of sanity
Girls & Booze to the point of insanity
(Ah, Mother, wake me for lunch)
So precious our time
No time for books
(Hey Dad, what time does the game begin?)

Saturday night, relived at Tuesday lunch
(She was so sweet)
Oh Sunday's leisure is much too short
(Hey sis, get me another beer)
And back to the barrenness for another week

Saturday and Sunday
My how you grow to be
Friday nights
(meet me at the car at 3)
Till Monday noon
(Do *Not* Disturb!)

So Bless you Father Time
To give us these days
for our weekly rest.

Things to Do Around a Ship at Sea

Go out with a small flashlight and a star chart, on a
good night,
and check out the full size of Eridanus.
Sunbathe on a cot on the boatdeck
Go forward and talk to the lookout, away from the
engines,
the silence and shudder
Watch running lights pass in the night.
Phosphorescing creatures alongside the shipside,
burning spots in the wake.
Stag, Argosy, Playboy, and Time.
Do pushups.
Make Coffee in the galley, telling jokes.
Type letters to his girl friend in Naples for the
twelve-to-four Oiler
Sew up jeans.
Practise tying knots and whipping
With the Chief Cook singing blues
Tell big story lies
Grow a beard
Learn to weld and run a lathe
Study for the Firemans Oilers and Watertenders exam
Tropic- and sea-bird watching
Types of ships
Listening to hours of words and lifetimes—
Figuring out the revolution.
Hammer pipes and flanges
Paint a picture on a bulkhead with leftover paints
Dream of girls, about yr girl friend, writing letters,
wanting
children,
Making plans.

RADIO CITY

The sea grows harsh
as we sail along,
rolling and pitching about.
I try to talk
yet can't even walk
in my room where I am now.
The doors swing open
like the famed Rockettes,
doing their timely dance
While my eyes are reeling,
and stomach rolling
my head feels heavy
as in some sort of trance.
Let the movements stop
and the waves stop thrashing
I can't stand this stumbling around.
I long for New York or some other port
where I'll be able to feel
solid ground.

“THESE ARE THE TIMES THAT TRY MEN'S SOULS”

We, the Class of 1972 have lived through the beginnings of a revolution. As individuals we feel growing pains, we ask is there sanity left in the world, and we sit and wonder. There is an awareness of something happening in the world today, a spirit of defiance as everyone goes in search of their identity. The Maritime College is also in search of its' identity. The Mission of the College is in crisis. The demerit system is under attack, the job situation is dismal and even some academic courses are being questioned for their relevance. Yet we go on living. Day in and day out we follow those busy little routines we have set up for ourselves. Despite the chaotic times and the turmoil in our souls we grow and even make progress.

Eight Bells is a look backwards. An attempt has been made to let pictures tell the story and avoid long, sentimental, wordy accounts of the Class of 1972. Many things have been left out, but we all have our memories to reflect on friends, experiences, joys and pain over these four years.

To the Class of 1972, best of luck and smooth sailing.

*In 1971 we towed, pushed or docked a million tons
of shipping per day. That takes a lot of power.
McAllister has what it takes.*

With one of the largest modern fleets of tugs and barges, it figures. We're best equipped for lighterage and every movement. Short haul or long, we're ready. With the right power for every job.
